

Illinois Solar for All
A STATE PROGRAM

Savings Renters Can Count On

Illinois Solar for All (ILSFA) is a state program that ensures income-eligible **renters** will save on their electric bills through solar subscriptions.

Illinois Solar for All: Community Solar Helps You Save Money!

Eligible renters who receive an electricity bill can save by subscribing to a shared solar project called Community Solar. Community Solar allows residents within utility areas to subscribe to the shared, off-site solar project. Residents receive electricity bill credits based on their portion of electricity generated from the solar project.

Benefits of Participating in Illinois Solar for All: Community Solar

- ILSFA ensures you pay less than you would without joining the program. Savings are required by the program.
- Most subscriptions have no upfront payments to sign up.
- We require our approved solar companies, called Approved Vendors, to follow clear requirements, transparent pricing, and fair practices to ensure you're protected!

See If You're Eligible

ILSFA is available to renters in Illinois whose income does not exceed 80% of the Area Median Income (AMI) and who reside in the same electric utility territory as the community solar subscription. If you participate in programs like SNAP or Medicaid, you might automatically qualify.

Are you ready to save money with solar? Get started!
